In the Energy Business
Knowledge is the Real Power

The power sector is a complex industry with many challenges. To be successful you need a legal advisor who has experience with the complexities involved, who can help manage the risks and partner with you to achieve your goals.

At Borden Ladner Gervais LLP, our team has over 25 years of experience providing legal and strategic advice on corporate and regulatory matters, environmental, project finance, construction, M&A, and tax matters for clients across the entire energy sector.

To find out more about our Electricity Markets Group please contact:

APPrO conference: www.appro2019.com
Use the APPrO 2019 conference app: https://appro.org/app
Welcome from APPrO President & CEO

Welcome to the 31st Annual Canadian Power Conference and Networking Centre – APPrO 2019: “The Inflection Point”.

Across the world power grids are undergoing a major upheaval. Many believe the system is approaching a critical turning point in terms of electrification, the integration of vastly increased numbers of players, a shift in focus towards the grid edge, de-carbonization, the widespread deployment of game-changing storage, responsive energy management technology, digitization, sharing technology, new approaches for ensuring resource adequacy, and more.

How rapidly will these changes take place, at what scale, and where? How will they interact, and how can system operators, regulators, policy makers and market participants prepare for them? These are the opening questions for APPrO 2019. There’s little doubt that the future belongs to those who can see the inflection points ahead and put in place the necessary strategies to adapt to them. The APPrO conference continues to provide a forum to share and discuss what’s in store for power suppliers in Canada. This year’s program will delve into these and many more issues to help you face the changes ahead. Hear from visionaries and innovators on how they are redesigning and remaking the power system. APPrO will continue to present high level networking opportunities, unrivaled content, top-notch speakers, and crucial discourse on the new world of power, viable business plans and commercial opportunities in Canadian power.

On behalf of myself, our Conference Chair, Stephen Somerville, the APPrO Board of Directors, Conference Committee and our hardworking APPrO staff, thank you for your continued interest and active participation. We pledge to continue offering the best programming and networking in the business. We welcome you on November 21 & 22 at the Westin Harbour Castle Conference Centre - right on the waterfront in downtown Toronto.

David Butters, APPrO President & CEO

Hedley Palmer and WiRE awards

The Hedley Palmer award is presented annually to an individual who has made an outstanding contribution to the power generation industry in Ontario. We believe the Hedley Palmer Award is the highest honour in the Canadian power generation business.

The original award was created by the Independent Power Producers’ Society of Ontario (IPPSO) in 1989 to honour an individual who in the judgment of the IPPSO Board had made an outstanding contribution to the independent power industry. It has been given to a different individual each year since then, almost always as a surprise, during the banquet dinner at the annual IPPSO or APPrO Conference.

Visit the APPrO website to see more information on the Hedley Palmer award origins, previous winners and nomination details for 2019.

Presented annually at the Canadian Power Banquet Dinner, the WiRE Woman of the Year Award (WOTY) recognizes and celebrates professional women working in the energy sector who go above and beyond ‘business-as-usual’.

WiRE Award nominees stand out through excellence in areas such as leadership, policy and advocacy, technical advancement and R&D, project development, community engagement and increased adoption of RE technologies, volunteering and/or being a role model contributing to the advancement of women in the energy sector.

WiRE presents three Women of Distinction Awards annually. To see more on these awards, and the nominations process, please visit the WiRE website.

APPrO – the Association of Power Producers of Ontario
67 Yonge Street, Suite 1040
Toronto, ON, M5E 1J8
APPrO is a non-profit organization representing a wide range of companies involved in the generation of electricity in Ontario, including power generators, equipment suppliers, and providers of legal and consulting services. APPrO members produce power from cogeneration, hydro-electric, gas, coal, nuclear, wind energy, solar energy, waste wood and other sources.

APPrO focuses 100% on the business issues of power producers in Ontario. Our varied membership provides an all-inclusive view of the market and positions APPrO as the leading advocacy group for generators in Ontario, giving voice to all parts of Ontario’s generation sector.

Each November in Toronto, APPrO hosts the leading power industry event of its kind in Canada, the Annual Canadian Power Conference and Networking Centre.

APPrO also publishes IPPSO FACTO Magazine, the top periodical in Canada’s power supply industry, as well as the Canadian Power Industry Directory online.

No matter what happens to global adjustment or the power market. An Ecomax power plant will save you money!

Peak Power you can count on
- Extended output to address "peak shifts"
- Full rated output for life of equipment
- Emergency capability during prolonged grid outages
- Adaptability to changing GA regimes
- Heat recovery option (CHP)
- Low cost continuous operation ($/kWh)
- Automated dispatching to hedge against HOEP
BLG provides specialized legal, regulatory and strategic advice to electricity generators, developers, lenders, investors and government entities throughout Canada. Our experience includes providing advice on all aspects of project development for all forms of generating projects (renewables and non-renewables) including structuring, financing, tax, construction, First Nations, power purchase agreements, cap and trade regimes, environmental approvals and permitting. We regularly appear before regulatory tribunals across Canada on electricity and natural gas rate cases and other regulatory issues and approvals. We have acted for numerous municipal utilities and their shareholders in respect of mergers, acquisitions, purchases and sales of various utilities. We also provide advice to utilities and consumers regarding electricity and natural gas issues in respect of ongoing legal regulatory requirements including conservation and demand management. Our experience and dedication have resulted in BLG being ranked in the top tier of Canadian law firms in the power sector.

Barbara Clemenhagen, VP Market Intelligence
With industry evolution comes the need for employers to find innovative ways to meet talent demand, retain high performers and be nimble—to ramp up teams for new technology investments, and to upskill teams as legacy infrastructure is replaced. That’s where Electricity Human Resources Canada comes in. EHRC is the only national electricity organization driving HR best practices and skills development to manage the industry’s most critical asset: our people. We provide evidence-based solutions to the human resource challenges facing the electricity industry – we are an enabler, research hub, convener and an active partner helping industry secure Canada’s long-term electricity supply. Our members represent
all stakeholders working in or with the sector including employers, educators, labour, and governments.
